PROFILE SUMMARY

I have over 3 years of web development expertise, specializing in Full Stack Development. My experience spans from building interactive UIs to facilitating seamless data management, integration across platforms and API integration. I excel in React, Angular for UI development and harness Node.js, Java for streamlining backend processes, including database management, and API implementation. I have navigated diverse projects leveraging range of tools and technologies, including AWS and Google Cloud services. I thrive in dynamic team environments, prioritizing client needs to ensure success.

SKILLS

Front End: JavaScript, HTML, TypeScript, CSS, SASS | **Back End / Server-Side Programming:** Node.js, Java, Spring Boot
Frameworks/Libraries: Angular, React, Redux, Express, Mongoose, TailwindCSS
Database: MongoDB, MySQL, PostgreSQL | **Cloud:** AWS (Lambda, EC2, S3), GCP | **Agile:** JIRA, Trello, Confluence
Tools: GIT, NPM, Postman, Figma, Jenkins Pipeline (CI/CD) | **Other:** RESTful APIs, Responsive Web Design.

EXPERIENCE

Front End Developer

Mar. 2022 – Apr. 2024

NBN Co Ltd, Melbourne, VIC

- Developed reactive and template-driven forms using Angular, TypeScript for the public website, incorporating validation and ensuring mobile responsiveness to enhance the user experience across all devices.
- Utilized AEM (Content Management System) along with HTML, JavaScript, and CSS to create and author reusable components, resulting in a 30% reduction in content creation time and a 20% increase in site consistency.
- Developed RESTful APIs and micro services using Java and Spring Boot supporting a 50% increase in application scalability.
- Integrated APIs to retrieve data and make requests, ensuring seamless data flow and functionality within the application.
- Applied Test-Driven Development (TDD) to increase overall code coverage from 40% to 49% by creating comprehensive unit test cases, thereby enhancing code reliability and maintainability.
- Enhanced accessibility from 42% to 51% to meet WCAG standards, improving usability for all users.

Front End Developer

Mar. 2020 – Feb. 2022

Fitcus, Melbourne VIC

- Transformed wireframes into reusable UI components using React, ensuring responsiveness and cross-browser compatibility.
- Incorporated the Axios library for efficient HTTP requests, optimizing CRUD operations and back-end interactions, which resulted in a 25% decrease in response times.
- Utilized React hooks and Redux for state management, improving data sharing between components, enhancing application architecture, and reducing code redundancy.
- Participated in code reviews and contributed to the adoption of Agile methodologies within the team, enhancing team productivity by 15%.
- Used the MySQL database for real-time data storage and retrieval.

Junior Developer

Jul. 2017 – Jul. 2018

Marine Electricals, Mumbai

- Created interactive and responsive web applications with React, utilizing Redux for efficient state management across the application.
- Developed and maintained RESTful APIs using Node.js and Express.js for communication between front-end and back-end.
- Integrated CRUD operations in Node.js API endpoints to manage data stored in databases like MongoDB.
- Developed and utilized custom middleware functions in Node.js for logging, error handling, validation, and request processing.

EDUCATION

RMIT University

Jul. 2018 – Jul. 2020

Master of Information Technology

Melbourne, VIC

Mumbai University

Jul. 2013 – Aug. 2017

Bachelor of Engineering (Computer Engineering)

Mumbai, Maharashtra

CERTIFICATIONS

- AWS Cloud Practitioner
- Web Developer Boot Camp - Inco Academy, Australia
